Product Key

Manufactured in New Zealand

Non toxic and kinder on the environment

For use in the home

For use in the garden

For use on the land

NoPests®

Pest control doesn't have to be hard! NoPests® is about bringing no-nonsense, effective, do it yourself pest control to the people.

Products that Really Work

Tested and proven within New Zealand's harsh, and often unforgiving environment ensuring that every product is up to the task.

Easy Application

Effective do it yourself pest control with simple instructions ensures success no matter your level of experience.

Non Toxic Environmentally Friendly

We try our best to use non toxic ingredients to ensure we are being friendly to the environment. However, this is not always possible as some pests are more difficult to control than others. You can identify the non-toxic products in our range by the "Non Toxic" logo.

New Zealand Made

Where possible, we develop and manufacture our NoPests® products in New Zealand ensuring that our products are tailored for our unique environment.

Innovative Technology

We are constantly reviewing our products to ensure that they are in-line with the latest in pest control innovation and technology. Whether this is the raw ingredients in our insecticides or the materials and construction of our traps and bait stations, you can be assured they are leading the industry.

Product Use Guide

Ants (Indoors) 	 NoPests® Crawling Insect Spray	Page 12
	Apply to nests, runs, walls, resting places or where ever ants are seen.	
	 NoPests® Ant Bait™, Exterm-an-ant® (Pg 14)	Page 13
	Apply enough NoPests® Ant Bait to feed all passing ants. Apply in long strips (50mm) by nests or highways. Pour Exterm-an-ant into dishes and place on trails or near nests.	
	 NoPests® Insect Dust	Page 12
Apply Inside walls, ceiling, under floor cavities.		
Ants (Outdoors) 	 NoPests® X-It Ant™	Page 13
	Spray all hard surfaces where ants are seen: a metre up and out from the house, paths, pergolas, compost surrounds, curbing, one metre band around tree trunks etc. Use only outdoors.	
	 NoPests® Insect Dust	Page 12
	Treat where ants are entering the house, inside wall cavities, under decks, rock walls, cracks and crevices.	
	 NoPests® Ant Bait™, Exterm-an-ant® (Pg 14), Vanquish™ (Pg 14)	Page 13
	Apply enough NoPests® Ant Bait to feed all passing ants. Apply in long strips (50mm) by nests or highways. Pour Exterm-an-ant into dishes and place on trails or near nests. Apply Vanquish in 2m grid over whole section in the evening. Note: Vanquish is for Argentine Ant only.	
 NoPests® Sand4Ants, Biforce® Granules (Pg 13)	Page 12	
Apply to areas where ants are active and where possible directly to the nest. Use on organic or inaccessible areas where spraying has limited effect. e.g., gardens, grass, bark, compost.		
Cockroaches 	 NoPests® Crawling Insect Spray	Page 12
	Apply to walls, skirting boards, cupboards, behind sinks, stove and pipes and cracks and crevices.	
	 NoPests® Roach Bait	Page 14
	Apply as small spots to harbourage areas, Apply behind appliances, plumbing pipes, wall voids. Apply two spots/m ² for light infestations and five spots/m ² for heavy infestations.	
 Vendetta® Cockroach Gel Bait	Page 14	
Apply as small spots to harbourage areas, Apply behind appliances, plumbing pipes, wall voids. Apply two spots/m ² for light infestations and five spots/m ² for heavy infestations.		
Flies 	 NoPests® Bug Spray™	Page 8
	Ensure coverage of walls, ceilings, skirting boards, window sills and all exposed surfaces where flies may rest. Do not allow spray to contact food, food preparation surfaces or food utensils.	
	 NoPests® Disposable Fly Bag Trap	Page 10
Set up away from the house. Will catch large numbers of flies and can be used in any outdoor situation. Cheap, use once and discard first defence against flies.		

PRODUCT TYPE: Spray Dust Bait Granules Trap Gel Deterrent

Cluster Flies 	NoPests® Crawling Insect Spray	Page 12
<p>Mist into ceiling voids and spray outside landing areas to repel cluster flies. Apply before flies start gaining entry for winter hibernation.</p>		
Fleas & Ticks 	NoPests® Crawling Insect Spray	Page 12
<p>Apply to floors, carpets, skirting boards, kennels, pet bedding and adjacent wall areas as a coarse spray. Keep pets off applied surface until dry.</p>		
NoPests® Bug Spray™		
<p>Ensure coverage of walls, ceilings, skirting boards, window sills and all exposed surfaces where flies may rest. Do not allow spray to contact food, food preparation surfaces or food utensils.</p>		
Mosquitos 	NoPests® Bug Spray™	Page 8
<p>Spray around and inside buildings. Apply to walls, skirting boards, and all exposed surface areas where mosquitoes may rest. Coverage of damp dark areas and foliage around likely breeding sites outside will limit their harbourage areas.</p>		
Silverfish 	NoPests® Bug Spray™	Page 8
<p>Locate the source of infestation and spray. If the source cannot be located spray all surfaces on which silverfish travel. These are mainly dark areas, in cupboards and around book shelves.</p>		
NoPests® Insect Dust		
<p>Apply to cracks and crevices as well as wall and ceiling voids. Dust all areas where Silverfish are frequenting inaccessible to spray.</p>		
Crickets 	Crickoff Pro Black Field Cricket Bait	Page 14
<p>Apply Crickoff Pro to pasture using a hand held shaker or seed spreader when crickets first appear at a rate of 11kg per hectare.</p>		
Carpet Beetle 	NoPests® Bug Spray™	Page 8
<p>Apply enough spray to carpet areas infested with Carpet beetles. Ensure vulnerable areas are protected against spray drift (see label)</p>		

Product Use Guide

Spiders (General) 	 NoPests® Bug Spray™	Page 8
<p>Spray walls, ceilings and floor areas both indoors and exterior of buildings. Ensure vulnerable areas are protected against spray drift (see label)</p>		
White Tail Spiders 	 NoPests® Crawling Insect Spray	Page 12
<p>White tails are hunters and don't build webs. Using a non-repellent spray to cover trails, around outside lights and harbourage areas will give long term control. Inside cupboards, and ceiling voids are good habitats for white tails.</p>		
Wasps 	 NoPests® Insect Dust, Dust2Dust™ (Pg 13)	Page 12
<p>Use the NoPests® Insect Dust apply into the nest entrance in the evening or after dark (this is the safest time).</p>		
	 NoPests® Wasp Dome Trap	Page 10
<p>Re-usable wasp dome for use with Nopest Wasp lure. Use in high summer months to control active wasp populations and also in winter and spring months to control queen wasps, preventing population growth.</p>		
	 NoPests® Wasp Lure	Page 10
<p>Chemical Free. For controlling nuisance wasp's around the home use NoPests® Wasp lure in either a NoPests® Dome Trap or Disposable Wasp bag.</p>		
	 Wasp Bag Disposable	Page 10
<p>Single-use, disposable wasp trapping system for use with NoPests® Wasp Lure. Use in high summer months to control active wasp populations and also in winter and spring months to control queen wasps, preventing population growth.</p>		
	 WaspJet Pro®	Page 10
<p>Spray early morning or late evening when most wasps are back in the nest and less active. Hold can upright and target spray towards the nest with the wind coming from behind you. Wear protective clothing when treating nests and stand at a safe distance, not directly underneath.</p>		
Rabbits 	 Pindone AgTech Rabbit Pellets	Page 16
<p>The only rabbit bait considered safe enough to be available to the general public. Pindone Rabbit Bait Pellets must be used with a bait station</p>		
	 NoPests® Multifeeder Bait Station	Page 16
<p>Rabbits don't like new things in their environment, so introduce bait stations a few days prior to filling with bait to ensure rabbits get used to their presence</p>		
<p>Place bait station in areas where rabbits have left dung heaps and scratchings.</p>		
<p>Restock the bait station every night to ensure bait station is only half filled with holes facing to the side for the first 3-4 nights. This ensures enough bait pellets are consumed by the rabbits for a lethal dose.</p>		
<p>Seal the bait station during the day and when wet weather is forecast to protect bait from exposure to the elements and non-target animal species.</p>		

PRODUCT TYPE: Spray Dust Bait Granules Trap Gel Deterrent

Rats 	Pindone Pellets Possums & Rats	Page 16
	Pindone Possum & Rat Bait Pellets must be used with a bait station	
	Contrac® Rodent Blox, Ditrac® Rodent Block (Pg 18)	Page 17
	Multi-feed (Ditrac) or a single-feed (Contrac) anticoagulant rodent bait for use in bait stations.	
	Tomcat® Rodent Station	Page 18
	Keeps your rodent control bait or traps away from children and pets and out of sight.	
	Pied Pier Bait Station	Page 17
	An easy set, refillable and weatherproof bait station for the control of rats. For use with Pindone Possum and Rat Pellets or Rodent blox's.	
	Snap Rat Trap	Page 19
	Simple, safe, sanitary and built to last.	
	Victor® Professional Rat Trap	Page 19
Trigger sensitivity on the Professional Rat Trap is determined after setting by simply moving arm toward the firm or soft position indicated as letters "F" or "S" on the side of the setting control. Further adjustments can be made by slightly bending the trigger arm.		
NoPests® Live Rat Cage	Page 17	
Rats are lured into the cage by bait applied to the hook. The trigger activates when the rat pulls on the bait.		
DOC Rat Tunnel	Page 18	
A specially designed H3 treated wooden box housing developed to hold rat snap traps.		
Modified Victor® Stoat and Rat Trap	Page 19	
A cost effective and lightweight alternative to the DOC 150 and 200 in a wooden box. Passed NAWAC testing when set in a DOC Rat Tunnel with a frontal approach.		
BaitSafe®	Page 20	
The next generation in bait station technology removing the need to enter small, uncomfortable or hazardous locations to install bait stations.		

Mice 	Contrac® Rodent Blox, Ditrac® Rodent Block (Pg 18)	Page 17
	Multi-feed (Ditrac) or a single-feed (Contrac) anticoagulant rodent bait for use in bait stations.	
	Tomcat® Mouse Bait Station	Page 18
	Keeps your rodent control bait or traps away from children and pets and out of sight.	
	Snap Mouse Trap	Page 19
Simple, safe, sanitary and built to last.		
BaitSafe®	Page 20	
The next generation in bait station technology removing the need to enter small, uncomfortable or hazardous locations to install bait stations.		

Product Use Guide

Possums 	○	Cat & Possum Cage Trap NC (2 doors)	Page 17
	Specialised two-door, plate operated, non-collapsible cage trap for catching feral cats and possums, popular with councils and landcare groups. Can be baited with apple for possums, or meat or chicken for cats.		
	○	Timms Trap, Trapinator Kill Trap	Page 20
	Specially designed instant kill traps for possums. Both traps can be modified for feral cats.		
Cats 	☐	Philproof Possum Station	Page 17
	A reusable possum bait stations for use with Pindone Possum & Rat Bait Pellets (sold separately). Position so possums can easily feed on the bait.		
	☐	Pindone Pellets Possums & Rats	Page 16
Pindone Possum & Rat Bait Pellets must be used with a bait station			
Slugs and Snails 	○	Cat & Possum Cage Trap NC (2 doors)	Page 17
	Specialised two-door, plate operated, non-collapsible cage trap for catching feral cats and possums, popular with councils and landcare groups. Can be baited with apple for possums, or meat or chicken for cats.		
Whiteflies & Aphids 	☐	NoPests® Delicia® SLUGG OFF® Lentils	Page 15
	Designed with slugs and snails in mind. Rapid uptake ensures maximum efficacy and therefore maximum crop protection. Free from dust, have a slim 'biting edge' allowing for easy consumption from even the smallest juvenile. Resistant to rain and mould for up to 4 weeks.		
Codling Moth 	○	NoPests® Flying Insects Sticky Traps	Page 8
	Hang the trap just above the plants using the twist tie supplied. Remember to move the trap higher up as the plants grow. Each trap will last for approximately 8 weeks or until sticky surface becomes covered with insects. Once at least half of the trap is covered in insects, wrap the trap in newspaper and dispose of in the bin.		
Codling Moth 	○	NoPests® Codling Moth Pheromone Trap	Page 9
	Hang the triangular (delta) cross-section trap during September before the moths start flying using the first lure and sticky glue insert. The trap is designed to protect 3-5 trees in a 12 metre radius. The pheromone lure attracts and traps male moths disrupting breeding and reducing infestation. Use your second lure and sticky glue insert to complete the season.		
Codling Moth 	💧	NoPests® Madex®2	Page 9
	Certified Organic spray to control codling moth larvae. Make the first application when codling moth larvae are hatching. This is normally from early to mid-October. Repeat applications at 7-14 day intervals till mid-December. A second infestation of young caterpillars may occur in mid-January.		
	Madex 2 used in consecutive seasons has a cumulative effect in the reduction of the codling moth population.		

PRODUCT TYPE:  Spray  Dust  Bait  Granules  Trap  Gel  Deterrent

Other Insects	<input type="radio"/> Beap Fruit Fly Trap	Page 11
 	<input type="radio"/> BEAP Fruit Fly Traps feature a food-grade, non-toxic luring solution which draws fruit flies into the trap where they can't escape.	
	<input type="radio"/> NoPests® Clothes Moth Trap	Page 8
	<input type="radio"/> Kapture® Pantry Moth Trap	Page 11
Birds	<input checked="" type="radio"/> Bird Free Bird Repellent Pre-dosed	Page 22
	The Bird Free gel appears to birds as fire and it is this effect that deters birds from landing. Left undisturbed, it will remain completely effective for at least three years after proper installation. Use Avisil glue adhesive to secure the dishes to ledges etc or Bird Free Hangers to use in trees.

	Hang outdoors in the breeze to control pesky birds.	

Flying Pests

NoPests® have developed an insect spray that controls a wide range of flying and crawling insects both inside the home and outdoors with knock-down, residual and repellent activity this may be the only spray you need. NoPests® Bug Spray™ is complimented with a range of non spray lures and traps for targeting specific pests around the home, garden and orchard.

NoPests® Bug Spray™

*DIY-NPBUGS

120ml

NoPests® Bug Spray is a liquid, general purpose insecticide, that is non staining has no odour and very economic to use. NoPests® Bug Spray has knock-down residual and repellent activity against most insect species such as fleas, flies and spiders. NoPests® Bug Spray is particularly effective for the control of flying insects.

Available in 120ml pack. **Makes 10 litres of spray.**

Active Ingredient: 25 g/L Deltamethrin

NoPests® Flying Insect Sticky Traps

DIY-YEMED10
DIY-YEL10

Medium
Large

Trap flying pests in conservatories, greenhouses and gardens.

Contains : 5 double-sided sticky traps and twist ties. LASTS FOR UP TO 8 WEEKS!

For the effective, safe control of a range of flying insect pests including: whitefly, blackfly, midges and thrips. For use in greenhouses, conservatories and gardens. Small flying insect pests are attracted to the trap's yellow colour. The NoPests® Sticky Trap is coated with a special "dry" glue - on both sides - which will not stick to your fingers or damage your clothes.

NoPests® Sticky Traps are shower proof only.

NoPests® Clothes Moth Trap

*DIY-NPCLOT

Use indoors in storage areas to trap annoying clothes moths.

Contains: 1 disposable trap and 1 pheromone lure. Lasts up to 6 weeks!

The moths are attracted by the pheromone lure. When the clothes moth's enter the trap they are caught on the non-drying glue coated on the inside faces of the trap. A patented black stripe is also printed on the card to further increase the insect attraction. The traps are designed to monitor the presence of *Tineola bisselliella* adult male moths in clothes and textiles.

NoPests® Codling Moth Pheromone Trap

*DIY-NPCMT

Contains: 1 Easy set delta trap, 1 hanger, 2 monitoring lures and 2 sticky glue inserts. REFILL KITS AVAILABLE!

Hang the triangular (delta) cross-section trap during September before the moths start flying using the first lure and sticky glue insert. The trap is designed to protect 3-5 trees in a 12 metre radius. The pheromone lure attracts and traps male moths disrupting breeding and reducing infestation. Use your second lure and sticky glue insert to complete the season. Traps are made of strong, rigid, corrugated plastic so they can be removed at harvest for use next season with a NoPests® Codling Moth Pheromone Refill Kit.

The codling moth is 8mm (5/16") long, grey, with black lines and a distinctive copper patch on the wing tips. Maggot damage in apples and pears is mainly caused by caterpillars of the codling moth. Female moths lay eggs on leaves and fruits. The eggs hatch after 10-14 days and caterpillars bore into the fruitlets carving galleries inside.

NoPests® Codling Moth Pheromone Refill Kit

*DIY-NPCMR

Refill kit for use with NoPests® Codling Moth Pheromone Trap. Contains: 2 monitoring lures and 2 sticky glue boards.

NoPests® Madex®2

DIY-NPMADEX2

60ml

Control Codling Moth in the orchard or home garden the natural way.

Madex 3 has been used in commercial apple and pear orchards for Codling Moth control for more than 20 years. It is an organic product based on a live organism - the Codling Moth Granulosis virus otherwise known as CpGV - a naturally occurring pathogen of the codling moth. Madex 2 is a diluted form of Madex 3 especially formulated for small orchards and home gardeners. It controls Codling moth caterpillars in their earliest juvenile stages before they begin to burrow into the fruit, it has a highly specific effect on fruit maggots and thus does not impact bees. Once caterpillars have burrowed deep within the fruit, they become impossible to control. Madex 2 will not control adult moths, therefore, early application provides the best results.

Sorry to be a buzz kill...
but flying pests can be pretty annoying!
Lucky for you NoPests® products are the
buzz kill everybody wants around!

NoPests® Wasp Dome Trap

TRI-WASP

A reusable Non Toxic wasp trapping system for use with NoPests® Wasp Lure (sold separately). Highly effective with the capacity to capture hundreds of wasps. When full, empty contents in trash and refill again with NoPests® Wasp Lure. Contains 1 Wasp Dome Trap (yellow base with clear lid) and 1 suspension string. Use in winter and spring for trapping of queens, and summer months when wasps are most active.

NoPests® Wasp Lure Refill

DIY-NPWASP1 **1L**
DIY-NPWASP5 **5L**

A specially formulated, non-toxic liquid lure which is attractive to wasps, but NOT to bees. For use in the refillable NoPests® Wasp Dome Traps or single use Disposable Wasp Bag Traps. Available in 1L & 5L packs.

Use in high summer months to control active wasp populations and also in winter and spring months to control queen wasps to help prevent population growth.

Wasp Bag Disposable

TRI-WFB

A single-use, disposable wasp trapping system for use with NoPests® Wasp Lure (sold separately). Highly effective with the capacity to capture thousands of wasps. When full, screw cap on and dispose of in normal waste. Contains 1 Wasp Bag Trap and 1 suspension string. A great way to control wasps in the garden.

WaspJet Pro®

PCC-WASPJ **400g**

Use outdoors for control of wasp nests. An aerosol that allows you to tackle wasp nests with confidence. The high output nozzle ensures that nests can be treated from a safe distance and quickly soak the nest. The combination of double strength actives and rapid penetration solvents, ensures the wasps are "paralysed" on contact before dropping to the ground. Best results are achieved if wasps are sprayed directly. Spray early morning or late evening when most wasps are back in the nest and less active. Hold can upright and target spray towards the nest with the wind coming from behind you. Wear protective clothing when treating nests and stand at a safe distance, not directly underneath. Available in 400g pack. For larger wasp nests use NoPest® Insect Dust.

An excellent product for treatment of Paper wasps and their nests.

NoPests® Disposable Fly Bag Trap

DIY-DISFLYB

A single-use, non-toxic, disposable fly trap containing a food-based attractant. Highly effective with the capacity to capture up to 20,000 flies. When full, screw cap on and dispose of in normal waste. Contains 1 Fly Bag Trap and 1 suspension string.

Effective for many types of nuisance flies including blue bottle, green bottle and blow flies. Flies are a nuisance during summer and are a hygiene concern due to their carrying and transferring of disease-causing bacteria and parasites. They frequent food preparation and serving areas, rubbish bin areas and areas with farm animals where they scavenge for foodstuffs.

Beap Fruit Fly Trap

DIY-BFFT6

Use indoors for control of fruit flies.

A non toxic, disposable fruit fly trapping system that is easy, safe and discrete. Virtually odourless and mess-free, use throughout the home to lure and trap nuisance fruit flies. Each trap lasts 30 days, simply toss when finished. Contains 6 Fillable Traps (clear) and 1 x 75ml bottle of liquid attractant.

Kapture® Pantry Moth Trap

*DIY-KAPMO

Trap a wide range of pesky moths in the kitchen or pantry.

Contains: 2 ready to use Pheromone Traps. Lasts for 3 months!

A patented, free standing trap design which mimics specific pheromones to attract male moths that normally infest foodstuffs such as rice, flour and pet foods etc. Effective and safe to use in and around kitchen cupboards. The pheromone trap remains effective for approximately 12 weeks after which period if moths are still present the trap should be replaced. One trap is sufficient for an average size kitchen.

Upon entering the trap the male moth is stuck on to the sticky board and therefore the life cycle is interrupted as the female moth remains unfertilized. Often the first indication of the infestation is the appearance of small moths flying about or the presence of caterpillars in or near food packages. Pantry moths can breed continuously in favourable conditions.

Oh, for flying out loud! Flying pests in the garden, patio, kitchen and cupboards? These are the products you need, tested and proven in New Zealand!

Crawling Pests

NoPests® have developed a crawling insect spray that controls a wide range of crawling insects both inside the home and outdoors with a high level of surface residual efficacy. This is complimented with their insect dust and a range of products which specifically target various ant species.

NoPests® Crawling Insect Spray

*DIY-NPCRBS

100ml

A high-quality fast knock-down, non-repellent insecticide that provides long term pest control against many crawling insects including cockroaches, ants, fleas, spiders, carpet beetles and silverfish. Due to its zeta sized formulation technology, NoPests® Crawling Insect Spray offers better coverage and a higher contact rate, leading to better results and greater efficacy than standard formulations. NoPests® Crawling Insect Spray is a surface residual insecticide and can be used effectively indoors and outdoors including porous areas such as brick, concrete and unpainted timber, without leaving staining deposits.

Available in 100ml pack. **Makes 10L of spray solution.**

Active Ingredient: Contains 100g/L Bifenthrin in the form of a suspension concentrate.

NoPests® Insect Dust

*DIY-NPINSDU

100g

Want to get rid of ants, cockroaches, wasps and silverfish for good?

NoPests® Insect Dust is a ready to apply dust for the long term control of wasp nests. The dust is super fine and light allowing the small particles to easily penetrate nests. Perfect for indoor and outdoor pest control. Shake bottle before use to maximise spread.

Available in 100g pack. For larger pack size see Dust2Dust 2kg

Active Ingredient: Contains 20g/kg Permethrin in the form of a dust.

NoPests® Sand4Ants

*DIY-NPANTS05

500g

NoPests® Sand4Ants is a superior residual contact insecticide for the fast and effective control of ants, fleas, ticks and lawn pests outdoors. Designed to control major pest species of ants including the Black house ant, Argentine ant, White-footed house ant and Darwin's ant. NoPests® Sand4Ants can be used to control pest insect problems on lawns, compost heaps, gardens, shrub areas, pot plants and the external surrounds of buildings and structures. Available in 500g Shaker pack. For large areas see Biforce Granules 5kg.

Active Ingredient: Contains 2g/kg Bifenthrin

NoPests® X-it Ant

*DIY-NPXANT
DIY-NPXANT1

225ml
1L

A non-repellent, long lasting insecticide specifically designed for New Zealand's outdoor conditions. NoPests™ X-it Ant is effective for several months against all ant species in New Zealand including Argentine and Darwin's ants and also very effective against other crawling insect pests such as cockroaches and spiders.

Spray onto outdoor areas such as paths, driveways, irrigation pipes, trees, gardens and building exteriors. Rainfast after 1 hour of sunlight. NoPests™ X-it Ant has quick initial knockdown on contact and after 96 hours has delayed activity by attaching to the insect's feet when walked on, and is taken back to the nest. The chemical is also transferred to other insects when preening each other.

Available in 225ml and 1L packs. Dilution rate: 15 ml per 1L water.

Active Ingredient: Contains 80g/L Bifenthrin.

Note: A clean sprayer with no prior chemical residue spray is required.

NoPests® Ant Bait™

*DIY-NPAB20G

20g

NoPests® Ant Bait is a premium ant bait that has no odour, is non-staining and easy to apply. The highly palatable bait matrix in NoPests® Ant Bait encourages ants to consume as much bait as possible and return it to the nest. NoPests® Ant Bait controls all major pest species of ants found in NZ, such as Black house ants, Argentine ants, White footed house ant and Darwin's Ant.

Active Ingredient: Contains 0.5 g/kg Indoxacarb in the form of a gel bait.

Biforce® Granules

PCC-BGR05

5kg

Biforce Granules is a superior residual contact insecticide for the fast and effective control of ants, fleas, ticks and lawn pests outdoors. Designed to control major pest species of ants including the Black house ant, Argentine ant, White-footed house ant and Darwin's ant. Easy to apply by hand applicator or spreader. Biforce Granules can be used to control pest problems on lawns, parks, golf courses, turf farms, sports fields, compost heaps, gardens, shrub areas and the external surrounds of buildings and structures. Available in 5kg pack. For smaller pack see NoPests® Sand4Ants 500gm.

Biforce Granules are a heavy sand granule insecticide, most effective at targeting organic insect-infected areas (such as turf, bark gardens, gravel, compost heaps, garden and shrub areas) where conventional spray and dust pest control products cannot penetrate deep into swath or inaccessible areas. The heavy regular shaped granules of Biforce Granules allow the particle to successfully drop through thick vegetation to where the insects are located.

Active Ingredient: Contains 2g/kg Bifenthrin

Dust2Dust™

PCC-DUS02

2kg

Dust2Dust is a superfine permethrin insecticide dust for the long term control of ants, cockroaches, fleas, wasps, silverfish, bedbugs and other insects. Dust2Dust is a very fine, fluffy powder and will not clog your puffer. It is ready to use and requires no further dilution. Its lightness and small particle size mean it can easily penetrate cracks, crevices and cavities, and can be moved long distances with the use of a B&G Bulb Dust-R or Makita Electric Blower (Battery Operated).

Available in 2kg pack. For smaller pack size see NoPests® Insect Dust 100g

Active Ingredient: Contains 20g/kg Permethrin in the form of a dust.

Exterm-an-ant®

*PCC-EXANT

100ml

A liquid formulation ant bait based on organic ingredients which are highly palatable to ants. Using insect pheromones as part of the attractant, the active ingredient, boric acid is applied without dilution near ant trails. The ants take the product back to the nest which kills the nest.

Vanquish™ Argentine Ant Bait

PCC-VANA325

325g

Use outdoors to control annoying ants.

A very effective ant bait in the form of a pale green paste for the control of Argentine ants and other ant species.

Available in 325g packs.

Active ingredient: 0.1g/kg Fipronil

NoPests® Roach Bait

DIY-NPCRB

20g

Use indoors to control annoying cockroaches.

This easy to use gel bait is specifically designed to control major pest species of German and American cockroaches. NoPests® Roach Bait contains the active ingredient indoxacarb, which does not cause immediate mortality, allowing the cockroach to return to harbourage areas where other cockroaches will become contaminated, greatly increasing the level of control.

Available in 20g tube.

Active Ingredient: 6g/kg Indoxacarb

Vendetta® Cockroach Gel Bait

PCC-VEND

30g

Use outdoors & indoors to control annoying cockroaches.

Vendetta™ Cockroach Gel Bait is a specially formulated, high-performance spot and crack/crevice gel bait. Highly attractive and effective - even on the toughest, "hard-to-kill" cockroach populations. Watch the numbers of German Cockroach and American Cockroaches drop.

Available in 30g pack.

Active ingredient: Abamectin B1

Crickoff Pro Black Field Cricket Bait

PCC-CRICK

22kg

Highly palatable malathion-treated whole wheat bait for the most effective control of black field crickets in all environments. Its superior palatability and efficacy will result in rapid knock down and control of the target pest ensuring maximum pasture survival and growth.

Convenient 2-hectare treatment 22kg bags

Active Ingredient: Malathion

Slimey Pests

Slugs and snails can really rip your veggies. Put a stop to them with NoPests® Delicia Sluggoff® Lentils - highly effective even in damp conditions.

NoPests® Delicia® SLUGGOFF® Lentils

DIY-SLUG003

300g

Delicia Sluggoff Lentils have been specifically developed to help in the fight against all active stages of the snail and slug life-cycle including juveniles. The unique patented extrusion process has for the first time resulted in a product that is designed with slugs and snails in mind. Rapid uptake ensures maximum efficacy and therefore maximum crop protection. Free from dust they have a slim 'biting edge' allowing for easy consumption from even the smallest juvenile. Resistant to rain and mould for up to 4 weeks.

Also available in 8kg resealable bags.

Active Ingredient: 30g/kg Metaldehyde in the form of a granular bait.

With up to 27,000 teeth slugs and snails can make a real mess in your veggie patch - not to mention the slime trails - yuck!

Furry Pests

While some of them may look cute furry animals can be a real pain and can cause real damage to your vegetable patch and property, not to mention our native flora and fauna. NoPests® have you covered with a range of bait and trapping options.

Pindone AgTech Rabbit Pellets

VTA-PDR25 **25kg**
 VTA-PDR10 **10kg**
 *VTA-PDR02 **2kg**

The only rabbit bait considered safe enough to be available to the general public. Pindone AgTech Rabbit Pellets are a first generation anticoagulant cereal based pellet. A great deal of Pindone would need to be consumed for animals, such as cats and dogs, to suffer poisonous effects which makes Pindone less hazardous to non-target animals while still being lethal to rabbits. Rabbits like the taste of the pellets so will keep coming back for more ensuring a lethal dose is consumed. Pellets are coloured green to deter birds and other native wildlife from consuming. The risk of secondary poisoning to dogs is also low due to rabbits mostly meeting their end while tucked up in their burrows. Available in a 2kg, 10kg and 25kg pack.

To be used in a NoPests Multifeeder - see below

In the unlikely event that a pet manages to consume a significant volume of Pindone, their gums will become very pink to signify their exposure and a visit to the vet for a Vitamin K Injection will have them back to their normal selves.

NoPests® Multifeeder Bait Station

BS-NOPMBS

A reusable rabbit bait station for use with Pindone Rabbit Bait Pellets (sold separately). Ideally suited for lifestyle blocks, orchards, vineyards and gardens. Easy and safe to move around, the canister construction protects bait from decay and exposure to the elements. Designed to eliminate spillage and waste, and is ideal for rabbits with up to three rabbits able to feed at once. Ensure the bait station is placed out some days before bait is added. Holes should be turned to the side and sleeve only half filled. The outer sleeve allows the station to be sealed, dry and weatherproof during the day, and opened at night when rabbits are more active.

Pindone Pellets Possums & Rats

VTA-PDPR25 **25kg**
 VTA-PDPR10 **10kg**
 *VTA-PDPRO2 **2kg**

Pindone Possum & Rat Bait Pellets are a first generation anticoagulant cereal based pellet. A great deal of Pindone would need to be consumed for animals, such as cats and dogs, to suffer poisonous effects which makes Pindone less hazardous to other animals while still being lethal to possums and rats. Pindone is NOT effective on mice. Possums and rats like the taste of the pellets so will keep coming back for more ensuring a lethal dose is consumed. Pellets are coloured green to deter birds and other native wildlife from consuming. Available in a 2kg, 10kg and 25kg pack.

Pindone Possum & Rat Bait Pellets must be used with a bait station like the Philproof Possum Bait Station for possums (sold separately) and the Pied Piper Bait Station for rats (sold separately).

In the unlikely event that a pet manages to consume a significant volume of Pindone, their gums will become very pink to signify their exposure and a visit to the vet for a Vitamin K Injection will have them back to their normal selves.

Pied Piper Bait Station

BS-PIPER

A reusable rat bait station for use with bait such as Pindone Possum & Rat Bait Pellets, Contrac Rodent Blox or Ditrac Rodent Blocks (all sold separately). Sturdy and solid, interlocking design keeps bait contained within the bait station. Provides superior weather protection to bait by keeping bait 70mm off the ground. Tunnel design provides rats a safe feeding area, free from predators, encouraging bait consumption. Holds up to 700g of Pindone (approximately 350 pellets) or approximately 19 x 28g blocks of Contrac or Ditrac.

Philproof Possum Bait Station Mini

BS-PPMIS

A reusable possum bait station for use with Pindone Possum & Rat Bait Pellets (sold separately). Made of heavy duty plastic with a removable base for refilling. Fully weatherproof with an 800g bait capacity. A nail and spacer are provided for mounting on a tree trunk approximately 30cm above a tree branch allowing possums to easily feed on the bait.

NoPests® Live Rat Cage

*TR-LRCAGE

A reusable, live-capture rat trapping system. Designed to catch, not kill, meaning no poison, no blood and no injury. Rats are lured into the cage by the bait applied to the hook. The trigger activates when the rat pulls on the bait. The trap door is powered by two powerful springs closing very quickly leaving little chance for rodents to escape.

The NoPests® Live Rat Cage can also be used to capture other pests such as possums, small stray cats, weasels, rabbits and more. Simply use bait/attractant appropriate to the pest you are trying to catch.

Cat & Possum Cage Trap NC (2 doors)

TR-CPTRS2

A two-door, plate operated, non-collapsible cage trap for feral cats, possums or rabbits. Following capture, the door remains locked in the closed position so that it is impossible for the animal to escape. Specialised for catching feral cats and possums, popular with councils and Landcare groups. Can be baited with apple for possums, or meat or chicken for feral cats.

Dimensions: Approximately 305mm x 305mm x 710mm (WxHxD)

Contrac® Rodent Blox

- VTA-CONSB2 **2 x 225g**
- VTA-CON12 **12 x 28g**
- *VTA-CON18 **1.8kg**
- VTA-CON08 **8kg**

A second generation, single-feed anticoagulant rodent bait that kills rats and mice fast. For use with bait stations such as Tomcat Mouse Bait Station, Tomcat Rodent Station or Pied Piper Bait Station. A proven formulation with an optimal blend of ingredients and low wax content for high palatability and weather-ability. An ideal choice for all-round control of rats and mice.

Available in 2 x 225g, 12 x 28g, 1.8kg and 8kg packs.

Active Ingredient: Bromadiolone

*SOLD /CTN ONLY

Ditrac® Rodent Blox

VTA-DITSB4	450g
*VTA-DIT18	1.8kg
VTA-DIT8	8.2kg

A first generation, multi-feed anticoagulant rat bait that is less hazardous to other animals than 2nd generation baits. For use with bait stations such as Tomcat Low Profile Rat Bait Station, Tomcat Rodent Station or Pied Piper Bait Station. A proven formulation with an optimal blend of ingredients and low wax content for high palatability and weather-ability. A better choice for when non-target animal species are a concern.

Available in 450g, 1.8kg and 8kg pack.

Active Ingredient: Diphacinone

Tomcat® Mouse Bait Station

DIY-TCMBS

A reusable bait station for use with Contrac Rodent Blox (sold separately). Ideal for indoor as its patented triangular design easily fits in corners, behind appliances and in tight areas where mice like to travel and nest. Mice do not hesitate to enter and once inside, baffles lead rodents directly to bait which cannot be removed from the station. Tamper-resistant with a special key required to unlock, the Tomcat Mouse Bait Station is perfect for securing mouse bait around the home to protect children and dogs from getting at the bait.

Contains 1 Rat Bait Station (black low profile) and 1 Tomcat special key.

Tomcat® Rodent Station

DIY-TCRS

A reusable and high quality station for use with Contrac Rodent Blox bait (sold separately) or traps such as Tomcat Rat Trap, (sold separately). Suitable for indoor or outdoor use, the Tomcat Rodent Station keeps your rodent control bait or traps away from children and pets and out of sight. The impact resistant material is incredibly durable and the rounded interior corners make cleaning a breeze.

Contrac Rodent Blox are held in place with rods to ensure the rodent cannot remove the bait from the station. The Tomcat Rat Trap fits within the station. The Tomcat Rodent Station is tamper-resistant and locks automatically on close with the Tomcat two-prong 'key' required to unlock, protecting children and dogs from getting at the bait or trap.

Contains 1 Rat Station (black) and 1 Tomcat two-prong 'key'.

DOC Rat Tunnel

TR-DCRTUN

A specially designed H3 treated wooden box housing developed to hold rat snap traps. Designed to exclude non-target species, protect the trap and provide public safety. To be used with the Tomcat Rat Trap or Victor Professional Rat Trap.

**Rat-a-tat-tat, you've got an unwanted visitor!
Set yourself up with our selection of traps, baits,
bait stations and tunnels.**

Modified Victor® Stoat and Rat Trap

TR-VICSTOAT

A cost effective and lightweight alternative to the DOC 150 and 200 in a wooden box. Passed NAWAC testing on Norway and Ship Rats and Stoats.

Victor® Professional Rat Trap

*TR-VICPR1

Effective for rat and stoat control, the original wood based wire snap trap provides instant rodent control and is safe for household use. For effective rat control, each rat trap comes pre baited with a large scented plastic Swiss cheese trip pedal which is easily activated by rodents interested in the bait and also through accidental contact as rats scamper across the floor.

Tomcat® Rat Trap

DIY-TCRT

A reusable rat snap trap that effectively incorporates the perfect combination of trap velocity and trigger sensitivity. It's patented, interlocking teeth make escapes virtually impossible. Safe and convenient, it can easily be set by hand or foot for placement in a variety of locations including inside the Tomcat Rodent Station for added security. Passed NAWAC testing when set in a DOC Rat Tunnel with frontal approach. Made from high-impact plastic and rust-resistant metals, the Tomcat Rat Traps have long lives and are plenty durable. The removable bait cup also allows the trap to be fully serviced without being set, further enhancing safety and usability.

Snap Mouse Trap

TR-SNAPCM

A reusable mouse snap trap that is easy to bait, set and release. Sensitive yet powerful with a pre-form bait reservoir. Simple, safe, sanitary and built to last. Made from durable polystyrene and steel.

Snap Rat Trap

TR-SNAPCR

The Snap Rat Trap is easy to bait, set and release. Sensitive yet powerful with a pre-form bait reservoir. Simple, safe, sanitary and built to last. Made from durable polystyrene and steel.

*SOLD /CTN ONLY

Timms Possum Trap

TR-TIMM

A trap designed to capture and kill possums. Use with apple as a bait. Can be modified to trap feral cats by enlarging the entry hole and using chicken or other meat as a bait.

Trapinator Kill Trap

TR-PTKT

A specifically designed humane trap for possums and feral cats. Lightweight design, portable and durable with one movement set arm, fully rotatable bait panel which allows for ease of application.

Tested and approved to meet NAWAC Standards NZ.

Baitsafe® Bait Station

BS-BAITSAFE
BS-BAITSAFE3

BaitSafe is the next generation in bait station technology. It removes the need to enter small, uncomfortable or hazardous locations when installing bait stations and works 24 hours a day to protect people and property from the dangers of rodents. Unlockable only with a special tool, the bait can't be accessed by children or pets tampering with the station, with the bait spike securing baits in place so they cannot be carried away and cached by rodents and eaten by non target species. For use in homes, apartments, offices, baches, schools, hospitals, stadiums the list goes on. BaitSafe can be installed in ceilings, eaves, external stud walls, lean-tos, sub floors or anywhere that rats and mice are found.

Odour bag

PHW-ODEB

Use indoors to remove odour caused by dead rodents.

A single use, easy to use bag which attracts and removes all types of odour molecules. Ideal for hard to reach places such as in ceilings or underfloor, where rodent carcasses cannot easily be removed. Simply place the bag near odour and it begins to work within 24 hours to several days. Can be left for 3-4 months and is safe around children and pets as the Odour Bag is non-flammable and contains only natural minerals with no chemicals, toxins or fragrances.

Bird Brained Pests

While most of the time our feathered friends don't bother us, sometimes they can make a bit of a nuisance of themselves, NoPests® have you covered with a range of deterrent options for keeping pesky birds away.

Hawk Bird Scarer

BIR-HAWK

The Hawk Bird Scarer is a full size replica hawk moulded from tough weather-proof plastic with imitation wing tips that flap when the bird is suspended. No power, wind or poison needed - environmentally friendly. One Hawk Bird Scarer would be suitable for the domestic back garden or pleasure craft. Suspending on a pole or guide-wire between 2 trees has the best effect. Effective against most birds such as starlings, mynas, pigeons, swallows, seagulls, ducks but does not give 100% results for sparrows.

Birdscare Balloon

BIR-SCBALL

Great for the veggie garden or home orchard, in crops, farm sheds, vineyards, berry patches and greenhouses. The bright colours, large predator eyes and hanging reflective streamers on these balloons are threatening to birds. Holographic predator eyes, bright colours and wind movement adds intimidation so they think they are being watched by a predator. Hang your vibrant Birdscare Balloon from trees or long poles. Its visuals will make your bird brained pests turn tail.

Birdscare Flash Tape

BIR-BST150

150m

Birdscare Flash Tape is a metallic tape (red on one side and silver on the reverse) which is very light and flutters in the slightest wind. Ideal for the protection of fruit, vegetables and lawn seedlings. Light reflection given off by the tape is a very effective bird scarer. Environmentally safe, effective, easy to use and will not harm birds.

Eaton 4 The Birds® Repellent Gel

BIR-EAT0300

300g

Use indoors and outdoors to control pesky birds. Used to discourage pigeons, starlings and other nuisance birds from nesting or perching on ledges, sills, roofs, peaks, cornices, bridges and overpasses. Eaton's 4 the Birds Repellent Gel can be safely used on house roofs where water is drawn for human consumption. All surfaces should be cleared of dust, dirt, droppings and loose debris before treatment application. Do not apply on locations where desirable species of birds might become entangled in the repellent. Available in a 300g pack.

Bird Free Bird Repellent Pre-dosed

BIR-BFDDISH

Bird Free Bird Repellent Pre-dosed dishes are a bird repellent gel inside low-profile (8mm high) application dishes for use with either glue adhesive or Bird Free Hangers. The Bird Free gel appears to birds as fire and it is this effect that deters birds from landing. Bird Free's deterrent effect on birds is long-lasting. Left undisturbed, it will remain completely effective for at least three years after proper installation. Includes 15 preloaded dishes.

Use Avisil glue adhesive to secure the dishes to ledges etc. or Bird Free Hangers to use in trees.

Bird Free Hangers

BIR-BFDISHA

Bird Free Dish Hangers are for use with Bird Free Bird Repellent Pre-dosed.

Specially designed to hang the Bird Free dishes when applying bird free gel to tree branches.

The view the full range of bird control products available visit keyindustries.co.nz

Prevent pesky nuisance birds from nesting, perching and getting into the garden at your place with our no-nonsense, effective, do it yourself bird control range.

Personal Protection

While we ensure our products are as safe as possible to use, we offer high quality Dräger masks to protect your breathing when in dusty or enclosed areas, and multi purpose chemically resistant nitrile gloves as an extra layer of protection for your hands.

Dräger Chemical Set X-plore® 3500

DRA-3504031

The Dräger X-plore 3500 premium half mask and filters comes ready to use and is high quality, low maintenance, inexpensive and comfortable. Includes a medium-sized Dräger X-plore 3500 Mask and a pair of unattached ABEK1HgP3 bayonet twin filters (replaceable). The bayonet filters are combination filters which means they have two layers. One layer protects against gaseous fumes and vapours (class 1) and the other layer protects against dust and particulates (class 3). Class 3 particle filters are 99.95% efficient in protecting against dust and particulates.

Supplied in a resealable plastic container for easy transport and storage.

Replacement Filter DRA-6738817

Dräger Chemical Set X-plore® 3300

DRA-R57794

The Dräger Chemical Set X-plore 3300 set comes ready to use and is high quality, low maintenance, inexpensive and comfortable. Includes a medium-sized Dräger X-plore 3300 Mask and a pair of unattached ABEK1HgP3 bayonet twin filters (replaceable). The bayonet filters are combination filters which means they have two layers. One layer protects against gaseous fumes and vapours (class 1) and the other layer protects against dust and particulates (class 3). Class 3 particle filters are 99.95% efficient in protecting against dust and particulates.

Supplied in a resealable plastic container for easy transport and storage.

Dräger X-plore® Mask Replacement Filters

DRA-6738817

2 pack

The ABEK Hg P3 filters from Dräger Safety protect against a massive range of gases and also particles. They are bayonet twin filters which means they must be used with masks which have a bayonet connection such as the Dräger Chemical Set X-plore 3300.

Black Dragon Nitrile Gloves

PPE-BDP1	S
PPE-BDP2	M
PPE-BDP3	L
PPE-BDP4	XL
PPE-BDP5	2XL

Recommended for use with most pest control products.

Ambidextrous gloves made from 100% nitrile rubber (5 times stronger than latex). Nitrile is chemically resistant therefore an ideal choice when handling oils, fuels and a wide range of chemicals. Non-slip textured finger tips for greater grip and beaded cuff for added strength (less likely to tear when donning). Black colour hides dirt and looks cool!

Available in packs of 100 in sizes Small, Medium, Large, X-Large, 2X-Large

AlphaTec® 2000 Overalls

PPE-OVB3	L
PPE-OVB4	XL
PPE-OVB5	2XL
PPE-OVB6	3XL

Proven protective barrier to low concentration liquid chemicals, liquid & particulate biological hazards. Excellent barrier to fine particulates (>0.01 microns) with bound seams.

3-piece hood, 2-way front zipper with resealable storm flap, finger loops. Elasticated hood, waist, wrists and ankles.

Breathable laminate material is moisture vapour permeable ("breathable") to help reduce heat stress.

Silicone-free, and low linting to reduce the risk of fibre contamination. Optimised body fit improves wearer comfort and safety. Anti-static - Tested according to EN 1149-5. Finger loops to prevent sleeve movement when working above your head. Type 5, Type 6 plus protection against radioactive particulates.

Colour: White

Sizes 4XL to 8XL available on request.

Dräger Workstar Flexothane Suit

DRA-R54522	M
DRA-R54523	L
DRA-R54524	XL

The Dräger Workstar Flexothane Suit is a one-piece overall design and is equipped with a hood and cord, sleeves with elastic ends and cuffs, as well as reflective strips on the upper arms. The ends of the legs can be adjusted using press buttons. The zipper runs vertically on the front of the overall, and is protected by a double flap.

This overall offers protection against crude oil, machine oil, petroleum, lubricants, etc. The light, water-vapour-permeable material offers a high degree of comfort and maintains its flexibility, even at very low temperatures.

NoPests[®] is supported by the larger Key Industries range.

Key Industries are dedicated to 'Protecting people, crops and native species' by providing agrichemicals and pest control products that have been proven to work in New Zealand. We focus on human safety, and minimising environmental impact, through the use of high efficacy products and smart application strategies. We provide a broad range of fungicides, insecticides, herbicides, foliar nutrients and adjuvants for agricultural and horticultural customers.

Our History

Key Industries is New Zealand's leading pest control products supply company. Founded in 1987, Key Industries was initially an agrichemical company providing specialty chemical products into the agriculture, horticulture and urban and industrial pest control markets.

Today it has grown into a company that provides both chemical and non-chemical products and services many more markets such as: wildlife conservation, organic food production, animal production, home garden, and export.

Tested and Proven in New Zealand

Key Industries allocate valuable time and resources to thoroughly test each product we develop or exclusively source from other suppliers to ensure they work effectively in New Zealand conditions.

We are driven to ensure that New Zealand producers always get a high quality product that performs effectively in our unique environment.

BioGro approved, Natural, and Non-Toxic.

Key Industries has a strong focus on developing and providing BioGro approved natural products suited to the New Zealand environment.

We offer a variety of natural products for both the DIY and Ag/Hort markets. We continue to build on our extensive knowledge of organic chemistry as we develop new products to meet the increasing demand for natural, non-toxic options.
